Conditions and requirements

This Letter of Award is subject to developments in the current pandemic situation "Corona / Covid 19". The period of the scholarship may have to be postponed.

To renew your scholarship after every funding year, your academic achievements to date must indicate that you can successfully complete your doctoral project within a reasonable period of time. Scholarship renewal depends on the submission of an annual progress report and a written statement to be presented by the academic supervisor of your PhD thesis. The report and written statement must be submitted at the latest three months before the end of the respective year of funding. If you are unable to successfully complete your doctoral project, DAAD reserves the right to discontinue scholarship payments. The scholarship then terminates at the end of month after you have received notification that your application has been rejected. The same applies if you fail to submit the required written statement and progress report despite being requested to do so.

§ 34 of the Ordinance Governing Residence applies to this scholarship. According to this, the visa for academics and scientists and dependants (spouses or partners, if the marriage or civil partnership already existed upon arrival in Germany, and minor, unmarried children) accompanying or subsequently joining them is not subject to the approval of the foreigners' authorities if the scientists are assigned a place by German scientific organisations or a German public body and in this connection are receiving a publicly funded scholarship in Germany.

The scholarship granted as part of the above funding programme is financed entirely from federal public funds.
