SUMMARY

Driven molecular biologist specializing in transcriptomics, RNA regulation, and host-pathogen interactions. Demonstrated expertise in mapping the host epitranscriptome and characterizing fungal small RNAs during infection. Highly proficient in bridging wet-lab molecular methodologies with computational high-throughput sequencing (NGS) analysis. Seeking to leverage a robust background in A-to-I RNA editing and fungal interaction models to drive high-impact discoveries in RNA dynamics.

TECHNICAL SKILLS

- **Bioinformatics & Transcriptomics:** RNA-seq, sRNA-seq, differential expression analysis (DESeq2), Alternative splicing analysis (rMATS), A-to-I RNA editing analysis, RNA structural analysis (SHAPE-seq), Transcriptome-wide data analysis and visualization
 - **Molecular Biology & Microbiology:** RNA/DNA extraction, quantification, qPCR, CRISPR/Cas 9, Western/Northern blot, sequencing preparation, immunostaining, LC-MS, Gibson Assembly Cloning
 - **Language:** Chinese (native), English (fluent), German (B1 in progress)
-

EXPERIENCES

Human PBMC transcriptome changes upon fungal stimulations

- Analyzed pathogen-specific transcriptomic signatures in human immune cells responding to fungal pathogens, characterized differentially expressed genes, RNA-seq, alternative splicing, A-to-I RNA editing, pathogen recognition receptor pathway activation
- Conducted comparative genomic and transcriptomic analyses to investigate pathogen biology using reproducible computational workflows

RNA landscape of human fungal pathogen *Aspergillus fumigatus*

- Developed computational workflows to characterize transcriptome-wide small RNA populations across fungal developmental stages and RNAi mutant strains.
- Performed comparative analysis of mRNA-seq and sRNA-seq datasets to identify regulatory pathways associated with fungal development and stress responses.
- Integrated sequencing analyses with experimental validation (Northern blotting and qPCR) to characterize pathogen-specific RNA regulatory mechanisms.
- Coordinated analyses within a large international collaboration involving multiple fungal genomics datasets.

Human neutrophils exporting extracellular RNA upon *A. fumigatus* confrontation

- Analyzed EV-associated sRNA, tRNA, and mRNA cargo from primary human neutrophils during fungal challenge

Non-coding RNA analysis of rice-*Xanthomonas oryzae* interaction

- Studied how T3SS-dependent bacterial effectors from *Xanthomonas oryzae* shape host non-coding RNA regulation; performed GUS reporter assays, plant cultivation, tissue preparation, LC-MS, qPCR, and PCR
- Engineered overexpressed and knockout mutants of circular RNA and microRNA in rice, established genetic tools that enabled investigation of ncRNA-mediated regulation

Teaching

- Microbiology and Molecular Biology, MMB005, 2022-2025. Supervised master students investigating gene regulation together with Dr. Blango and other colleagues.

EDUCATION

PhD | Microbiology, Friedrich Schiller University, Germany (supervisor: Dr. Matthew Blango) 2026

Thesis: RNA regulation in host-fungal interactions: investigation of the host epitranscriptome and fungal small RNAs

MSc | Bioengineering, Chinese Academy of Sciences, China (supervisor: Dr. Kuaifei Xia) 2021

Thesis: Non-coding RNAs ciR133 and miR168a-5p play roles in response to Xoo and abiotic stress in rice, respectively

CONFERENCES

- **2025 - Oral presentation:** German speaking Mycological Society (DMyKG), Germany
- **2025 - Poster:** Gordon Research Seminar - RNA Editing, Italy
- **2024 - Oral presentation:** Jena RNA Club Symposium, Germany
- **2024 - Poster:** RNA Society Meeting, UK
- **2023 - Poster:** EMBL - The Non-coding Genome Symposium, Germany

AWARDS & SCHOLARSHIP

- DAAD Scholarship 2021 - 2025
- Jena School for Microbial Communication (JSMC) travel grant 2023

REFEREE

- Dr. Matthew Blango (matthew.blango@leibniz-hki.de)
- Dr. Olaf Kniemeyer (olaf.kniemeyer@leibniz-hki.de)
