Cori Institute of Molecular and Computational Metabolism

Re: Scientific Coordinator

Dear Prof. Superti-Furga,

My name is Xiaoqing, I just finished my PhD study at Hans-Knöll-Institute in Jena, Germany. I am writing to apply for the scientific coordinator position at your lab.

I studied microbiology. My PhD project was focusing on double-stranded RNA metabolism in both humans and pathogenic fungi. On one hand, I was investigating host ADAR1-mediated A-to-I RNA editing pattern changes during fungal stimulations. Through characterizing transcriptomic responses after fungal challenges with a focus on host alternative splicing and A-to-I RNA editing, we surprisingly found out that *Rhizopus oryzae*, a human fungal pathogen that causes mucormycosis, can induce A-to-I hyper-editing as well as disrupt host RNA splicing. On the other hand, I was elucidating how the opportunistic pathogen *Aspergillus fumigatus* produces small RNAs, how dicer-like proteins process dsRNA substrates, and how excess dsRNA arrest fungal growth. I also combined bioinformatics and experimental validations to characterize the small RNA landscape and the contribution of RNAi machinery to fungal biology. This work has resulted in two publications on *RNA* and *Molecular microbiology*. At the same time, I was a DAAD scholarship holder, I was also awarded a travel grant by the local graduate school.

What draws me to this position is the combination of scientific depth and organizational responsibility at a moment when the Cori Institute is still being shaped. Having spent my PhD., I have seen firsthand how much the productivity of a lab depends on the coordination happening behind the science, keeping collaborations on track, meeting grant deadlines, onboarding new people, and maintaining clear communication across time zones and disciplines. I would welcome the opportunity to contribute to it.

Thank you for your time and consideration.

Best,

Xiaoqing

SUMMARY

RNA biologist and computational transcriptomics researcher with expertise in high-throughput sequencing, gene regulation, and RNA-mediated cellular responses. Experienced in integrating molecular biology with bioinformatics to study small RNAs, RNA interference, alternative splicing, and RNA editing across host and microbial systems. Proficient in RNA-seq analysis, reproducible computational workflows (R, Bash), and sequencing-based approaches for investigating post-transcriptional regulation.

TECHNICAL SKILLS

- **Molecular Biology:** sRNA cloning, NGS library preparation, GUS reporter assays, luciferase and GFP reporter assays, Gibson Assembly Cloning, Genetic Engineering, Northern Blot, qPCR, PCR, immunostaining, LC-MS, cultivation of microorganisms (BSL-1/2), plant cultivation and tissue preparation
- **Bioinformatics:** RNA-seq, sRNA-seq, differential expression, alternative splicing, small RNA characterization and target prediction, data visualization, HPC (Slurm), UCSC, SwissProt, KEGG, NCBI
- **Programming:** R, Python, Bash, Git, Docker, Linux
- **Language:** Chinese (native), English (fluent), German (B1)

EXPERIENCES

RNA landscape of human fungal pathogen *Aspergillus fumigatus*

- Characterized RNAi and tRNA fragments processing pathways in *A. fumigatus* across developmental stages (conidia, mycelium), revealing morphotype-specific RNA regulatory mechanisms
- Analyzed differential expressed genes on mRNA-, sRNA-seq datasets, uncovering post-transcriptional regulatory networks controlling fungal development and stress response.
- Validated genes of interest (sRNA, tRNA fragments, sRNA targets) via qPCR, northern blot

Human PBMC transcriptome changes upon fungal stimulations

- Analyzed pathogen-specific transcriptomic signatures in human immune cells responding to fungal pathogens, characterized differential expressed genes, alternative splicing, A-to-I RNA editing, pathogen recognition receptor pathway activation
- Built HPC pipeline, wrote custom R scripts for multi-condition cohort analysis

Human neutrophils exporting extracellular RNA upon *A. fumigatus* confrontation

- Analyzed EV-associated sRNA, tRNA, and mRNA cargo from primary human neutrophils during fungal challenge

Non-coding RNA analysis of rice-*Xanthomonas oryzae* interaction

- Studied how T3SS-dependent bacterial effectors from *Xanthomonas oryzae* shape host non-coding RNA regulation; performed GUS reporter assays, plant cultivation, tissue preparation, LC-MS, qPCR, and PCR
- Engineered overexpressed and knockout mutants of circular RNA and microRNA in rice, established genetic tools that enabled investigation of ncRNA-mediated regulation

Teaching

- Microbiology and Molecular Biology, MMB005, 2022-2025. Supervised master students investigating gene regulation together with Dr. Blango and other colleagues.

EDUCATION

PhD | Microbiology, Friedrich Schiller University, Germany (supervisor: Dr. Matthew Blango) 2026

Thesis: RNA regulation in host-fungal interactions: investigation of the host epitranscriptome and fungal small RNAs

MSc | Bioengineering, Chinese Academy of Sciences, China (supervisor: Dr. Kuaifei Xia) 2021

Thesis: Non-coding RNAs ciR133 and miR168a-5p play roles in response to Xoo and abiotic stress in rice, respectively

CONFERENCES

- **2025 - Oral presentation:** German speaking Mycological Society (DMykG), Germany
- **2025 - Poster:** Gordon Research Seminar - RNA Editing, Italy
- **2024 - Oral presentation:** Jena RNA Club Symposium, Germany
- **2024 - Poster:** RNA Society Meeting, UK
- **2023 - Poster:** EMBL - The Non-coding Genome Symposium, Germany

AWARDS & SCHOLARSHIP

- DAAD Scholarship 2021 - 2025
- Jena School for Microbial Communication (JSMC) travel grant 2023

REFEREE
